Kurada Naga Jagannadha Sri Charan

sricharan812006@gmail.com | linkedin.com/in/sri-charan-kurada-605638297 | github.com/knjsricharan | Portfolio

Summary

Full-stack software engineer experienced in building AI-integrated applications, REST API design, and cloud deployment (Vercel, Render). Proficient in React.js, Next.js, FastAPI, and LLM API orchestration. Focused on practical software engineering, generative AI workflows, and scalable full-stack architecture.

Education

Maharaj Vijayaram Gajapathi Raj College of Engineering — Vizianagaram, India
Bachelor of Technology in Computer Science and Engineering | CGPA: 8.70 — *2023 – 2027*

Tirumala Junior College — Vizianagaram, India
Intermediate | Percentage: 96.2% — *2021 – 2023*

Projects

CVInsights | *React.js, FastAPI, OpenRouter API, MongoDB, TailwindCSS*
github.com/knjsricharan/cvinsights | cvinsights.vercel.app — *Live, publicly deployed*

- Engineered a full-stack AI resume analyzer with a deterministic ATS scoring engine and role-aware LLM feedback layer, deployed on Vercel with public access
- Built React + FastAPI architecture with REST API integration, handling resume parsing, JSON validation, and fallback logic for robust LLM response handling
- Integrated OpenRouter-based multi-model routing with context-aware chat assistance, supporting dynamic prompt engineering per job role

CJ Assist | *Next.js, React.js, OpenRouter API, TailwindCSS*
github.com/knjsricharan/cj_assist | cj-assist.vercel.app — *Live, publicly deployed*

- Built a multi-provider AI workspace supporting simultaneous interaction with 5+ LLMs (GPT, Claude, Gemini, etc.) for side-by-side response comparison
- Architected a Bring-Your-Own-Key (BYOK) system with automatic provider detection and model routing, enabling zero vendor lock-in across AI providers
- Implemented real-time analytics dashboard tracking per-request latency, token usage, and estimated API cost across all active providers simultaneously

Experience

AI Intern — Jul 2025 – Sep 2025
EdiGlobe

- Trained and benchmarked 3 regression models (Linear Regression, Random Forest, XGBoost) using Scikit-learn and XGBoost; XGBoost delivered best performance across MAE, RMSE, and R^2 metrics
- Built end-to-end data preprocessing pipeline covering missing value handling, feature selection, and correlation analysis, reducing manual intervention in model preparation
- Produced comparative model evaluation report with MAE, RMSE, and R^2 metrics across all 3 models, providing data-driven justification for final model selection

Technical Skills

Languages: Python, Java, C++, C, Shell Scripting
Frameworks & Technologies: React.js, Next.js, FastAPI, Node.js, Flutter, HTML, CSS, REST API Design, Full-Stack Development
AI/ML: LLM API Integration, Generative AI, Prompt Engineering, Machine Learning, Scikit-learn, XGBoost, NumPy, Pandas
Databases: MongoDB, Firebase, SQL, DBMS
Tools & Platforms: Git, GitHub, VS Code, Vercel, Render, Agile Development

Certifications

- Oracle OCI AI Foundations Associate – Oracle (2025)
- Python Essentials 1 – Cisco Networking Academy (2024)
- Python Essentials 2 – Cisco Networking Academy (2024)
- NDG Linux Essentials – Cisco Networking Academy (2024)
- AWS Prompt Engineering – AWS Training & Certification (2025)
- ServiceNow Micro-Certification – ServiceNow (2025)

Achievements & Leadership

- Shortlisted in TechSprint 2026 AI Hackathon organized by GDG On Campus MVGR
- Lead Coordinator, AADHRITA HACK24 Hackathon — managed event logistics and participant coordination
- Competed in HackerRank GenZPulse 2026 26-hour Hackathon
